

Conext XW+ Power Distribution Panel

Save time and money installing and integrating XW+ system

The Conext™ XW+ Power Distribution Panel (XW+ PDP) is factory-wired and labeled to support the integration of multiple Conext XW+ inverter/chargers and Conext MPPT Solar Charge Controllers with a single battery bank. The XW+ PDP ships with breakers, bus bars and cables to install a single XW+ inverter/charger. With space to add wiring and breakers a single XW+ PDP supports one to three XW+ inverter/chargers, a diesel generator and either four MPPT 80 600 or four MPPT 60 150 Solar Charge Controllers. The XW+ PDP supports single-phase split phase or three-phase installations. A field-reversible door and multiple conduit knockout entry points allow for the XW+ PDP enclosure to be mounted and configured on either side of the inverter/charger.

The XW+ Power Distribution Panel is designed to save significant time and money during installation, when compared to custom solutions. A mounting bracket and Conext XW+ Conduit Box are also supplied with each XW+ PDP.
